Real Estate and Loans

The enlargement of the LOAN Market

so as to cover the wants and necessities of

the large number of honorable people who

are not owners of unimproved Real

Estate was one of the most necessary inno-

vations of recent years. To many it has

meant relief from pressing claims at the

very time when most essential. When

properly and honorably conducted this

business is of equally great importance

and value to the community as Building

and Loan Associations have proved them-

selves to be.

The Hawaiian Investment Co.

Makes a specialty of Negotiating and Pro-

cessing Loans for Borrowers who are un-

able to discount their Notes at the Banks

and who do not care to obligate them-

selves to some friend or acquaintance by

asking him endorsements to their Note.

This Company will make Loans upon

Household Furniture, Pianos, Organs,

Horses, Mules, Wagons, Carriages and

Personal Property without removing the

Property from the Borrower's possession

and all business will be conducted on a

STRICTLY CONFIDENTIAL BASIS.

The Hawaiian Investment Co.,

GENERAL REAL ESTATE AGENTS,

SATURDAY, JAN 5 1895.

TO CHEAPEN ELECTRICITY.

Advantages of Underground Con-
ductors Proved in San Fran-
cisco.

At intervals for months past elec-
tric light wires have been laid un-
derground and it has just been an-
nounced that the company intends
expanding in the very near future
from \$200,000 to \$250,000 in similar
work, says the San Francisco Chron-
icle. As the result of inquiry at the
office of the Edison Light and Power
Company it was learned that it was
a measure of economy to place the
wires underground.

One of the officers of the company
when interrogated upon the subject
said: "This laying of the wires un-
derground is, as a matter of course,
an expensive operation; that is to
say, the first cost is considerably
greater than that of stringing the
wires overhead, but in the long run
it is far more economical and we are
placing the wires underground, as
fast as we feel warranted in making
the outlay. The simplest proof
which I can offer of the assertion I
make is to be found in a comparison
of the rates of current charged for
by the overhead service as compared
with those for underground service.

"The company has been for years
past steadily reducing the price of
current. These reductions are due
to many causes which may be sum-
med up," said the officer, "in general
terms as the cheapening of produc-
tion. In addition to the advantages
of laying the wires underground,
many other improvements have been
made in the plant of the company,
and I question if there is any con-
cern in this city which has so assidu-
ously adopted every valuable inven-
tion for the advancement of its busi-
ness and the economic production
of its manufacture as the Edison
Light and Power Company. In the
matter of condensing water the com-
pany has in the past year built at
large expense a concrete tunnel,
which, running out into the bay,
conveys salt water to the condensers
and so saves the cost of fresh water.
The boilers are of the latest and
most economical type, and have re-
cently been fitted with automatic
coal feeders. The engines of the com-
pany are the most modern in the
United States for the purpose. They
are of the regular marine type, and
are constructed on a most economi-
cal plan.

"The best results are obtained
when the engines are run at an in-
creased speed developing an even amount
of power night and day. The nearer
we can keep our mains at their full-
est carrying capacity the cheaper
we can sell current, and as a conse-
quence the more our patronage is
increased the cheaper will be not
only the cost of production to us
but of consumption to the user. It
is to our interest to make reductions
whenever practicable, as the cheaper
we sell current the larger the
number of our clients will be.

"In February, 1894, we made a
general reduction of 10 per cent,
which was the fifth reduction in as
many years, and we are now prepar-
ing a schedule of rates to go into
effect January 1, 1895, which will
give our customers a further reduc-
tion of 10 per cent.

"Another feature of the business
which should not be lost sight of is
the wiring of buildings. Prior to
February, 1893, wiring was done in-
discriminately, and often by ir-
responsible parties. The result was
that when current was turned on
for lighting the wiring would not
stand. Generally the electric light-
ing company was blamed for poor
service so that our company in Feb-
ruary, 1893, announced that there-
after it would do all incandescent
wiring, where current was to be sup-
plied to their mains, at actual cost,
and since then we have done thou-
sands of dollars worth of wiring at
cost, and often at a loss, but the end
justified the means, and now we
rarely have a complaint on account
of poor wiring.

"Reductions will be made in cost
as fast as we can see our way to
making them and when it is remem-
bered that all the cuts in prices
have been made voluntarily and en-
tirely of our own motion I think
that San Francisco consumers of
electric light will admit that they
are well treated by us."

Evidence of Insanity.

They were discussing the question,
"Is Suicide an Evidence of Insan-
ity?"

"It's my opinion," said the man
who does all the talking, "that many
persons commit suicide who are not
only in their right minds, but who
in fact could not well show their
command over their faculties in any
other way.

"Now, for instance, I knew a man
once who had conducted an easy
and prosperous business for years,
was respected by all his friends and
neighbors, had no financial difficul-
ties worth speaking of, nothing to
trouble his mind, was, in fact, as
well-balanced a man as you could
find in any community, yet one
morning he was found hanging to
a rafter in his woodshed. And when
his motive became known, it con-
vinced everybody that his head was
as clear as the moment he fastened the
rope around his neck as it had ever
been in his life.

"What was his motive? Why, you
see, he was a country editor and had
written an obituary of an honored
and respected citizen which closed
with the words: 'He died full of
years.' Somehow or other the thing
came out in the paper reading, 'He
died full of beers.' Now, what else
could that editor do but go and
commit suicide?"—Buffalo Express.

G. R. Harrison, practical piano
and organ maker and tuner, can fur-
nish best factory references. Orders
left at Hawaiian News Co. will re-
ceive prompt attention. All work
guaranteed to be the same as done
in factory.

STONE, CONCRETE & PLASTER WORK

CONCRETE A SPECIALTY

JOHN F. BOWLER.

National Cane Shredder

PATENTED UNDER THE LAWS OF THE HAWAIIAN ISLANDS.

Mr. John A. Scott, Manager of the Hilo Sugar Company, gives the follow-
ing wonderful record of the working of the NATIONAL CANE SHRED-
DER, which was erected by their works at the commencement of the crop
just harvested:

"During the past week the Hilo Sugar Company's mill exceeded any of
its former records by closing the 125 hours grinding with an output of 3000
tons. This is fully 10 percent more than the best work of former years.

"The three roller mill being 26 in. by 54 in. and the two roller mill 30 in.
by 60 in. The first mill doing this amount of work in an efficient manner
and with great ease, compared with work on whole cane, owing to thorough
preparation of the cane by the National Cane Shredder, recently erected by
the Company.

"And by its use the extraction has been increased from 3 percent to 5 per-
cent on all kinds of cane, and in some cases 80 percent has been reached;
the average being 75 to 78 percent, according to quality.

"I continue to find the megass from shredded cane better fuel than from
whole cane.

"The shredder has been working day and night for seven months and has
given me entire satisfaction, having shredded during that time about seventy
thousand tons of cane, and a large part of it being hard ratoon.

"The shredder and engine require very little care or attention."

Plans and specifications of these Shredders may be seen at the office of

WM. G. IRWIN & CO., L'd.
